PROFILE

I am a motivated and detail-oriented Frontend Developer skilled in React, Next.js, TypeScript, and modern UI frameworks. I have hands-on experience building responsive, user-friendly, and high-performing web interfaces that enhance the overall user experience. I am passionate about writing clean, maintainable code, implementing best practices, and collaborating effectively within team environments.

SKILLS

Frontend Development: HTML, CSS, Tailwind CSS, JavaScript, Next.js, React.js, Redux, Context API.

Backend Development: Node.js, Express.js, MongoDB, Mongoose, TypeScript, REST APIs, JWT.

Tools: Git, GitHub, Figma, VS Code, Postman, Firebase, NPM, Vercel, Surge, Stripe.

UI Libraries: Daisy UI, Shadcn UI, Magic UI, Ant Design, AOS.

Soft Skills: Quick Learner, Teamwork, Self-Motivation, Time Management.

PROJECTS

Mozzo Bazar (Marketplace for Dine & Selling Used Items)

[Live Demo](#) || [Client Site](#) || [Server Site](#)

A secure and user-friendly restaurant management system with menu and order management, real-time tracking, and detailed reporting, allowing users to order from various food categories and restaurant operations.

- User Authentication: JWT-secured dashboards for Users, Members, and Admins, ensuring safe login access.
- Item Management: Add, edit, or remove menu items with full control to keep the database accurate and up-to-date.
- Order Tracking: Monitor active orders in real-time with instant status updates to ensure timely and delivery.

Technologies: React, Tailwind CSS, TanStack Query, Node.js, Express.js, MongoDB, JWT, Stripe, Firebase and Vercel.

StayVista (Hotel Booking Platform)

[Live Demo](#) || [Client Site](#) || [Server Site](#)

StayVista - A professional hotel and room booking platform that provides users with secure online reservations and room listing features. Anyone can also add their building rooms and rent them out.

- Role-Based Authentication: Secure user registration, login, and JWT-based authentication.
- Product Management: Admin can manage rooms (CRUD), approve orders, and track room locations.
- Order & Payment System: Users can add room to the cart, place orders, and make secure payments with stripe.

Technologies: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Stripe, Firebase, TanStack Query and vercel.

BMS (Building Management System)

[Live Demo](#) || [Client Site](#) || [Server Site](#)

A complete online room appointment system that provides users with a smooth and seamless booking experience. It includes secure authentication, room management, and real-time appointment tracking features.

- Secure Role-Based Dashboard: Dashboards for Users, Members, and Admins are secured with JWT authentication.
- Apartment Agreement System: Apartment booking with user agreements and admin approval system
- Admin Management Tools: Admins can manage members, announcements, room availability, and coupons.

Technologies: React, Tailwind CSS, TanStack Query, Node.js, Express.js, MongoDB, JWT, Stripe, Firebase and Vercel.

EDUCATION

Diploma in Computer Science & Technology

Dinajpur Polytechnic Institute, Dinajpur

2021-2022 (Present - 8th Semester)

LANGUAGES

English (Fresher)

Bangla (Fluent)

CERTIFICATION

Complete Web Development Course With Programming Hero
